

# SITC COVID-19 Resources

- The coronavirus (COVID-19) pandemic has affected all aspects of healthcare and the oncology. As immuno-oncology practitioners treat patients during the pandemic, it has also become apparent that the immunotherapy field may offer important insights into clinical practice, immune-related pathophysiology and other topics that may be useful to the broader healthcare community during this time of great need.
- [\*\*SITC Statements on and Publications\*\*](#) on immunotherapy access during the COVID-19 Pandemic.
- [\*\*JITC Publications\*\*](#) : All COVID-19 content in *JITC* has been curated into one collection for quick, easy access to publications from researchers and clinicians across the globe.
- **SITC COVID-19 Discussion Boards:**
  - [\*\*COVID-19 Implications for Patient Management Forum\*\*](#)
  - [\*\*COVID-19 Considerations for Basic and Translational Research Forum\*\*](#)
- [\*\*Additional COVID-19 Resources\*\*](#): Including disease specific information, general provider resources, investigator guidance, meetings and education, and more.
